

# New private swimming and wellness center concept

Imagine living in one of the metropolitan areas of the world and wanting to go for some swimming, sauna, relaxing and having fun, with your friends, colleagues or family – and with them only! That is what Aquapriva is all about.

Aquapriva is a new and unique private swimming and wellness center concept that can be built at suitable metropolitan areas around the world.

Aquapriva consists of separate private wellness areas with swimming pool, hot tub whirlpool, sauna and an integrated café and catering area, that can be rented for 2 hours or more.

Guests can use everything freely, turn on some music, change the light, take a shower, sit in the hot tub, swim in the pool, or use the sauna.

An integrated café is at their service whenever they want, with a well sorted variety of fine coffee and tea specialties, fresh fitness drinks and some wholefood snacks.

The idea is currently being worked out in detail by an early stage startup from Germany and they are looking for an investor.
